
Northeast Region Aquaculture Business

2004 Financial Benchmark Data

Robert A. Comerford, Ph.D.
Professor of Management
College of Business Administration
Ballentine Hall
University of Rhode Island

and

Michael A. Rice, Ph.D.
Professor
Fisheries, Animal & Veterinary Science
Woodward Hall
University of Rhode Island

NRAC Publication No. 04-003

Disclaimers:

Based upon work supported by the Cooperative State Research, Education, and Extension Service (CSREES), U.S. Department of Agriculture, under Agreement No. 97-38500-4641 and 98-38500-5917 awarded to the Northeastern Regional Aquaculture Center at the University of Massachusetts Dartmouth.

Opinions, findings, conclusions, or recommendations expressed in this publication are those of the authors and do not necessarily reflect the view of the U.S. Department of Agriculture, the Northeastern Regional Aquaculture Center, the University of Massachusetts Dartmouth, or The University of Rhode Island.

ACKNOWLEDGEMENTS

Although the authors are responsible for any errors of commission or omission in the report, the efforts of many people helped complete the study. In a survey of this sort, a hard working team of students typically provides the essential labor. In this case, early work on developing the mailing list was accomplished by Jill Long, a Ph.D. student in business administration at the University of Rhode Island College of Business Administration. Finalizing the questionnaire, conducting the mailings, and organizing the primary data and tabulating it in Excel fell to Jay D. Oliver, also a Ph.D. student in business administration at the University of Rhode Island College of Business Administration.

Special thanks are owed to all the people affiliated with the Northeastern Regional Aquaculture Center at University of Massachusetts Dartmouth (NRAC) for the financial and moral support that made the study and this document possible. Dr. Tomas V. Jamir, NRAC Program Director, made the study and its funding possible with his persistence and hard work. Julie Smith and Karen Tavares of NRAC helped keep us on track with their knowledge of USDA requirements and by providing us with NRAC's mailing list as a starting point for questionnaire mailings.

Mailing list development was not a straightforward task. Jill Long removed the entries in the initial list that were obviously not aquaculture firms and separated them by state. Then, the following Northeastern region aquaculture extension agents, also Co-Principal Investigators, added missing names and addresses, helped respondents within their states complete the questionnaire, and promoted the study and practitioner involvement in it: John Ewart, Aquaculture Specialist, Delaware Sea Grant Marine Advisory Service; Donald W. Webster, Area Extension Agent, Maryland Sea Grant; Gef Flimlin, Marine Extension Agent, Rutgers Cooperative Extension, Ocean County; Joyce Newman, Associate Extension Educator, New Hampshire Sea Grant; Christopher Bartlett, Marine Extension Associate, Maine Sea Grant; Tessa Getchis, Extension Educator, Connecticut Sea Grant; and William Burt, Extension Educator, Barnstable County Cooperative Extension. Without their help, the study never would have gotten off the ground.
